Dear Mr. Rawls,

Spartanburg Stainless Products would like to thank you and your organization for your cooperation and support in the purchase, installation and start-up of the air filter units for our seven John Deere robotic weld cells. We are very pleased with the final cell configuration that incorporates the filter unit with our weld cell allowing us the flexibility to relocate equipment with minimal effort. Your organization's experience and knowledge saved us time and effort through the process of optimizing this configuration. We have also been pleased with your response to our questions and concerns regarding the installation and operation of the equipment.

We look forward to working with you on future projects as the need arises.

Thanks again for your efforts.

Sincerely,

Gary Carpenter
Welding Engineer
